Professional Summary

Full Stack Developer with 1+ year of professional experience building and maintaining scalable web applications. Primary expertise in Node.js, Express, Vue.js, Angular, and MongoDB, with concurrent contract work in Full stack development. Experienced in deploying live production systems, optimizing APIs, and collaborating in multi-functional teams. Passionate about performance, maintainability, and clean code.

Work Experience

Freelance Web Developer (Contract) | Jul 2025 – Current | Remote

- Developed and maintained web application features using Node, Angular, JavaScript, SQL, HTML, and CSS.
- Implemented unit tests to validate functionality and ensure code reliability.
- Collaborated with stakeholders to gather requirements, plan sprint deliverables, and deliver technical solutions.

Associate Full Stack Developer | Huulke Technologies India Pvt. Ltd.
Jul 2024 – Jun 2025 | India

- Built and optimized RESTful APIs using Node.js and Express for a production platform handling 500,000+ API requests daily.
- Developed responsive front-end features using Vue.js and Angular, ensuring smooth integration with backend services.
- Designed and improved MongoDB schemas and query performance for scalable data operations.
- Contributed to full lifecycle development—feature planning, admin panel development, refactoring legacy code, and deployment processes.
- Coordinated with cross-functional teams during staging & production releases to ensure stable deployments.

Projects

NEO — Real Estate Platform (Live Production)
Tech: Node.js, Angular, MongoDB

- Engineered and optimized RESTful backend services supporting 500K+ daily API requests, improving reliability and response efficiency.
- Designed and refined MongoDB schemas to support high-volume property search, filtering, and listing workflows.
- Implemented dynamic server-driven templates and handled CSS/UI consistency across modules.
- Built and maintained admin capabilities for property lifecycle management, moderation, and publishing pipelines.

H-SPORTS — Staging Deployment
Tech: Node.js, Vue.js, MongoDB

- Designed database models and developed backend APIs to support event data, match structures, and user dashboards.
- Led modular Vue-based frontend implementation and ensured robust API integration across views.
- Mentored and guided a junior developer during feature implementation and code alignment.
- Played key role in integration testing, bug resolution, and preparing the system for staging release.

GERRY — Client Savings Platform
Tech: Node.js, Vue.js, MongoDB

- Contributed to full system development from ground up, spanning database structure, API architecture, and UI implementation.
- Developed authentication, session handling, and secure credential management flows.
- Implemented business logic for savings tracking, goals, and family-linked user interactions.
- Collaborated across modules to ensure stable releases and consistent feature behavior.

Alumni ERP — College Management System (Live)
Tech: Vue.js, Node.js

- Designed and implemented real-time-style communication/chat modules integrated with backend data services.
- Led frontend integration with APIs across alumni, student, and admin workflows.
- Improved UI presentation, layout consistency, and maintainable CSS structures.
- Supported team productivity by guiding component structuring and reusable design patterns.

Technical Skills

Languages: JavaScript, Java, Python, SQL
Frameworks: Node.js, Express, Vue.js, Angular
Databases: MongoDB (Atlas & Compass), SQL
Cloud: AWS (S3, EC2, Lambda)
Tools: Git, Postman, Tableau
Core Areas: REST APIs, Frontend & Backend Development, DB Modeling, Team Collaboration

Training & Certifications

- Full StackDevelopmentTraining(6Months) — Node.js, Vue.js, MongoDB
- Coding Ninjas Certifications: Java, C/C++, Python
- College-level programming competition awards

Education

R.D. EngineeringCollege | 2020-2024
B.Tech (Computer Science) - 7.6 CGPA
ST. Joseph's Academy |2019-2020
Intermediate 77% .
